

Press brake LVD PPEB 220/30 with Easy-Form

Monday, 27 March 2023 9:49 PM

LVD PPEB 220/30 with Easy-Form

Accuracy

Press accuracy is typically within 1mm and 1deg, and can vary with length.

Limitations

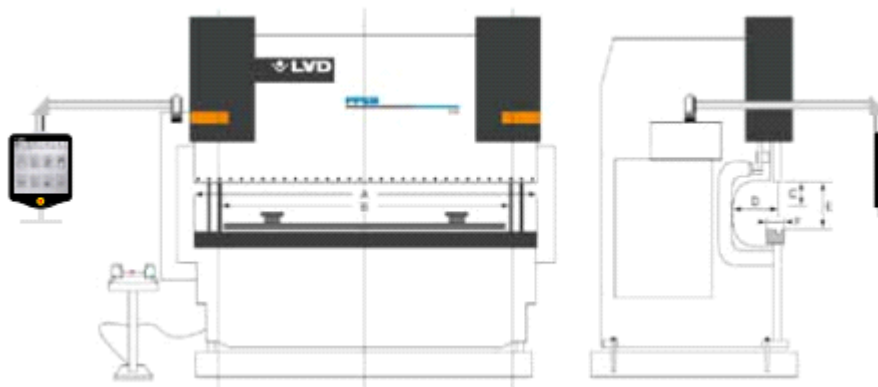

Maximum Thickness - up to 12mm (length limited by load)

Pressing Force - 2200 kN

Working Length - 3050mm

Distance between frame uprights - 2600mm

Stroke - 300mm

Our tooling range is growing continuously ensuring you receive access to the widest range of material and bending specifications. As well as the usual air-bending tools, we offer you a coining set for accurate bottom bending of thinner materials, a hemming tool set and a full range of radius tools.
